An overview of more points and functionalities are mentioned below in (functionalities table)

NSD RMS - Systems some functionalities

Restaurant System (RMS) supports the following functionalities	
Code	Functionalities Description
RMS -01	User friendly and dynamic POS interface
RMS -02	Support Multi POS
RMS -03	Unlimited Cashiers users
RMS -04	Efficient Control for Working Sessions
RMS -05	Multi-Currency Support and On time Currency Exchange
RMS -06	Unicode Support – Multi Languages “ Arabic / English “ By default
RMS -07	Admin control Tools
RMS -08	ALL in one POS interface for Dine-in mode , takeaway mode and delivery mode , with dynamic switching method
RMS -09	Visual Dine-in structure (sections – floors and tables)
RMS-10	Delivery customer registration with ability to retrieve registered customer info ,in reference of contact number
RMS-11	Support Multi printers for kitchens sections
RMS-12	Purchase Materials master data library
RMS-13	Purchase Materials master data management and Classification using material structure (group , subgroup , type , subtype ...)
RMS-14	Stock Management , multi Kitchens , and transfer stock management (Store\kitchens)
RMS-15	Stock waste and destroyed material management
RMS-16	Fiscal inventory management (stock in hand)

NSD RMS - Systems some functionalities

Restaurant System (RMS) supports the following functionalities	
Code	Functionalities Description
RMS-17	Ingredients material master data and registration tools
RMS-18	Recipes management and ingredients control
RMS-19	Purchases management , transaction registration , return purchase
RMS-20	Vendors and suppliers Information management (Code, Name, Address, Communication Information)
RMS-21	Vendors and suppliers Information accounts management
RMS-22	Payments vouchers
RMS-23	Receipts vouchers
RMS-24	Barcode generator
RMS-25	Design Barcode templates and support multi Size
RMS-26	Complex Barcode Feature (for barcode scales)
RMS-27	Import tools for Menu Item price from Excel Sheet
RMS-28	POS's Menu Items , relation management
RMS-29	Special customer (Members) Registration tools (Membership information's ,Name, contact number reference code , address)
RMS-30	Membership management and special customer programs
RMS-31	Membership tools and multi plans for Credit sales to control MAX credit limit
RMS-32	Membership tools and multi plans for debit accounts or prepaid sales (Gift cards)

NSD RMS - Systems some functionalities

Restaurant System (RMS) supports the following functionalities	
Code	Functionalities Description
RMS-33	Membership tools and multi Discount plans for regular customer and groups.
RMS -34	Membership tools and multi plans and methods for collecting points (customer Loyalty programs)
RMS-35	Membership special price plans for special customers and regular customers and groups
RMS-36	Catering management , special food package and on time meal package design tools
RMS-37	Happy hours programs tools for marketing Strategy
RMS-38	Menu session control (breakfast session – lunch session)
RMS-39	POS Users (cashier) admin users (purchase admin – privilege admin – super admin)
RMS-40	Item & Invoice Free Of Charge With daily budget Control (complementary – staff meals)
RMS-41	employees information registration including document expiration notifications and alert (Passport expiration , Visa expiration ,
RMS-42	Attendance application (built –in)
RMS –43	Integrate with External hardware (scale, barcode readers, receipt printers, cash drawer, Customer display...)
RMS –44	Efficient reports (working session report – daily report – customize period reports –, financial reports transaction wise , ,sales report cashier wise , sales reports POS wise ,
RMS –45	Sales report Item wise
RMS –46	Order types reports (dine-in , takeaway, delivery) , payment types reports (cash , credit card , cheques)
RMS –47	Employee info reports ,attendance reports (time sheet) , customer information's reports
RMS –48	Reports exporting tools (to excel – PDF – word ... ETC)

NSD RMS - Systems some functionalities

Restaurant System (RMS) supports the following functionalities	
Code	Functionalities Description
RMS -49	Graph reports
RMS -50	Mobile application (PDA - Windows Mobile environment)
RMS-51	Full online integration, through client intranet, with NSD BCS (NSD back office system)
RMS-52	Ability to synchronize with NSD BACK Office (Multi Branchs)
RMS-53	Ability to scan employees' documents
RMS-54	Ability for integration, through client SMS gateway, to send SMS related to closing day amount or other events

<p>Note: The above tasks' list is a resume of NSD RMS functionalities.</p>	

Other Benefits

Reducing the spent time to complete transactions, that allows managers and store owners to focus more on revenue-generating activities.

Increase accuracy of all operations' steps (Inventory variations, overstaffing....etc), also helping to support marketing activities

Improves customer services by speeding sales transactions, reducing errors, and minimizing out-of-stock-conditions.

The POS screen is designed to be fast and easy to use. Everything, from suspending sales to creating invoices , is available in this system

Other Benefits

- **NSD RMS - POS system is a full Fledge applications for Multi Points of sales, Multi Currencies, Multi Stores, Multi Users**
- **NSD RMS - POS is Easy to use**
- **NSD provides to its customers a best NSD RMS - POS and services, support, and expertise which they require to increase efficiency and profitability**

NSD RMS Integration

System Integration and sections:

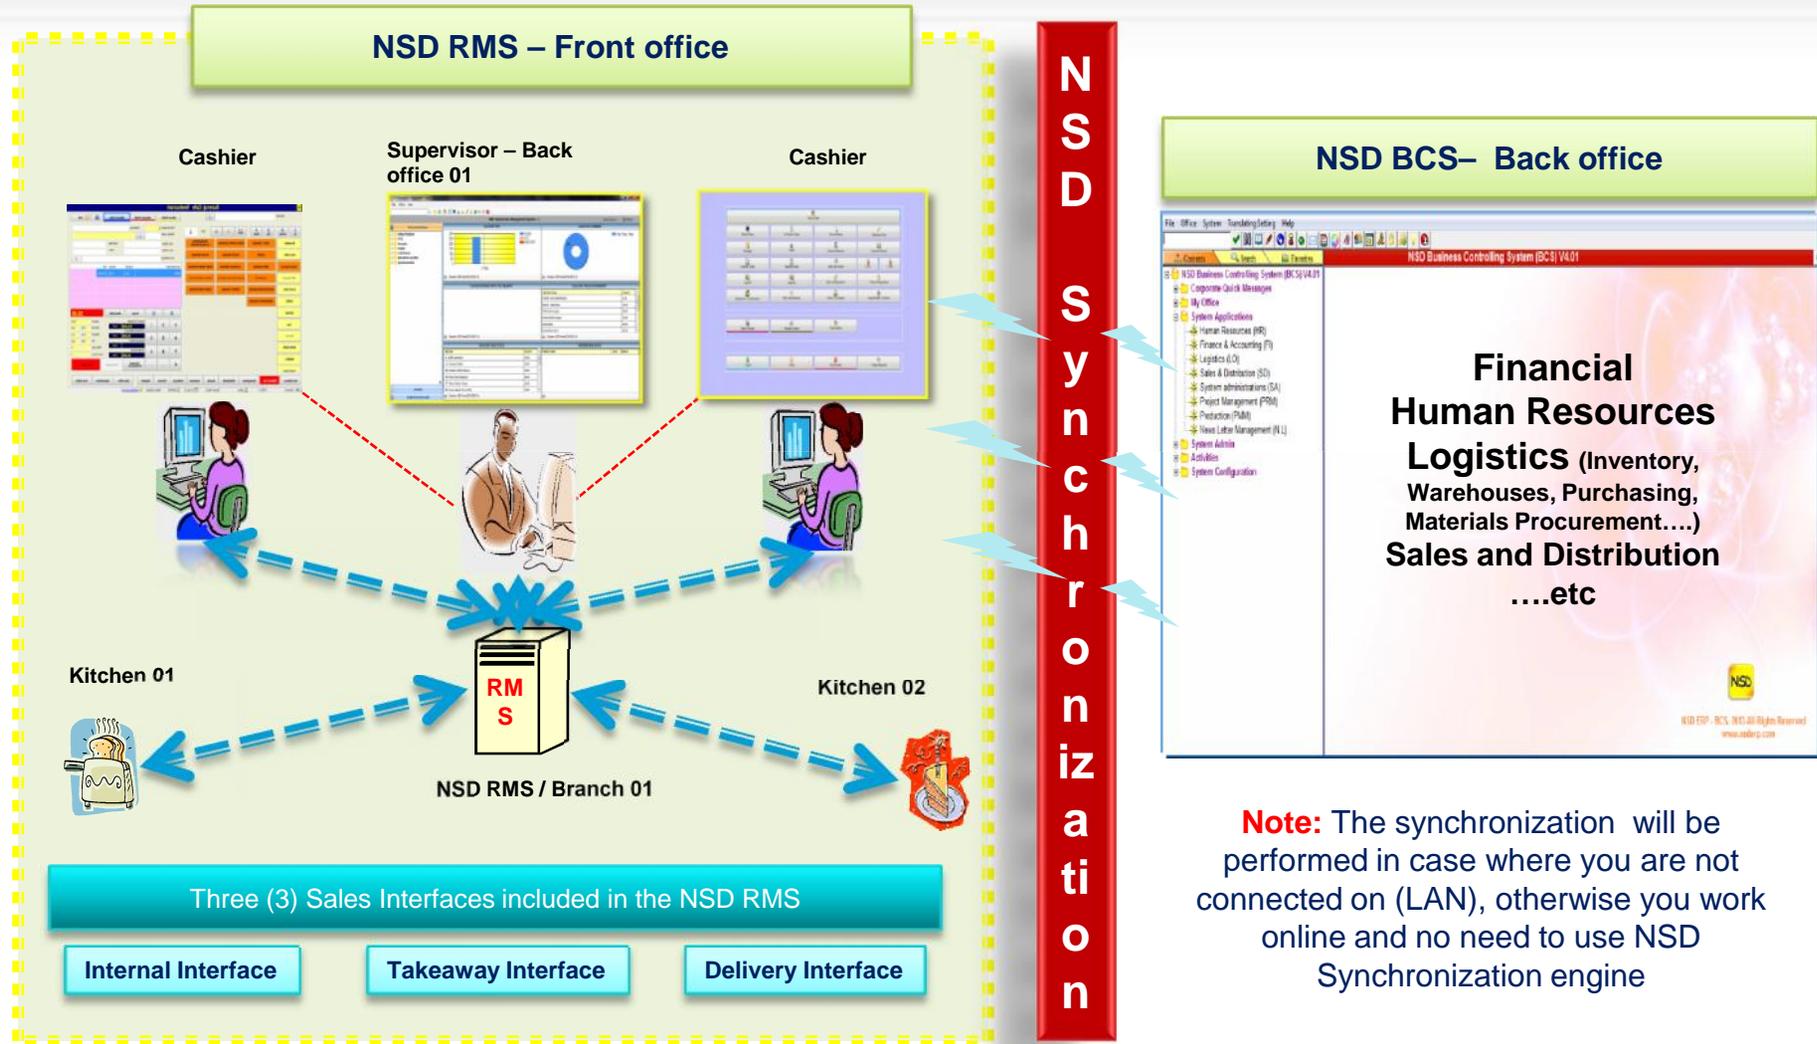

It is necessary to draw your attention that, NSD RMS is an integrated system including Front Office and Back Office.

These two sections (front and back) can be completed by NSD BCS (Applications System) which is considered as a power full back office, the whole package NSD (RMS + BCS) will allow you to manage the whole activities of your Point of Sales (restaurants) as well as your business management including;

**Human Resources,
Accounting,
Sales and Distribution including CRM,
Logistics including Warehouses Management and Inventory, purchasing....etc**

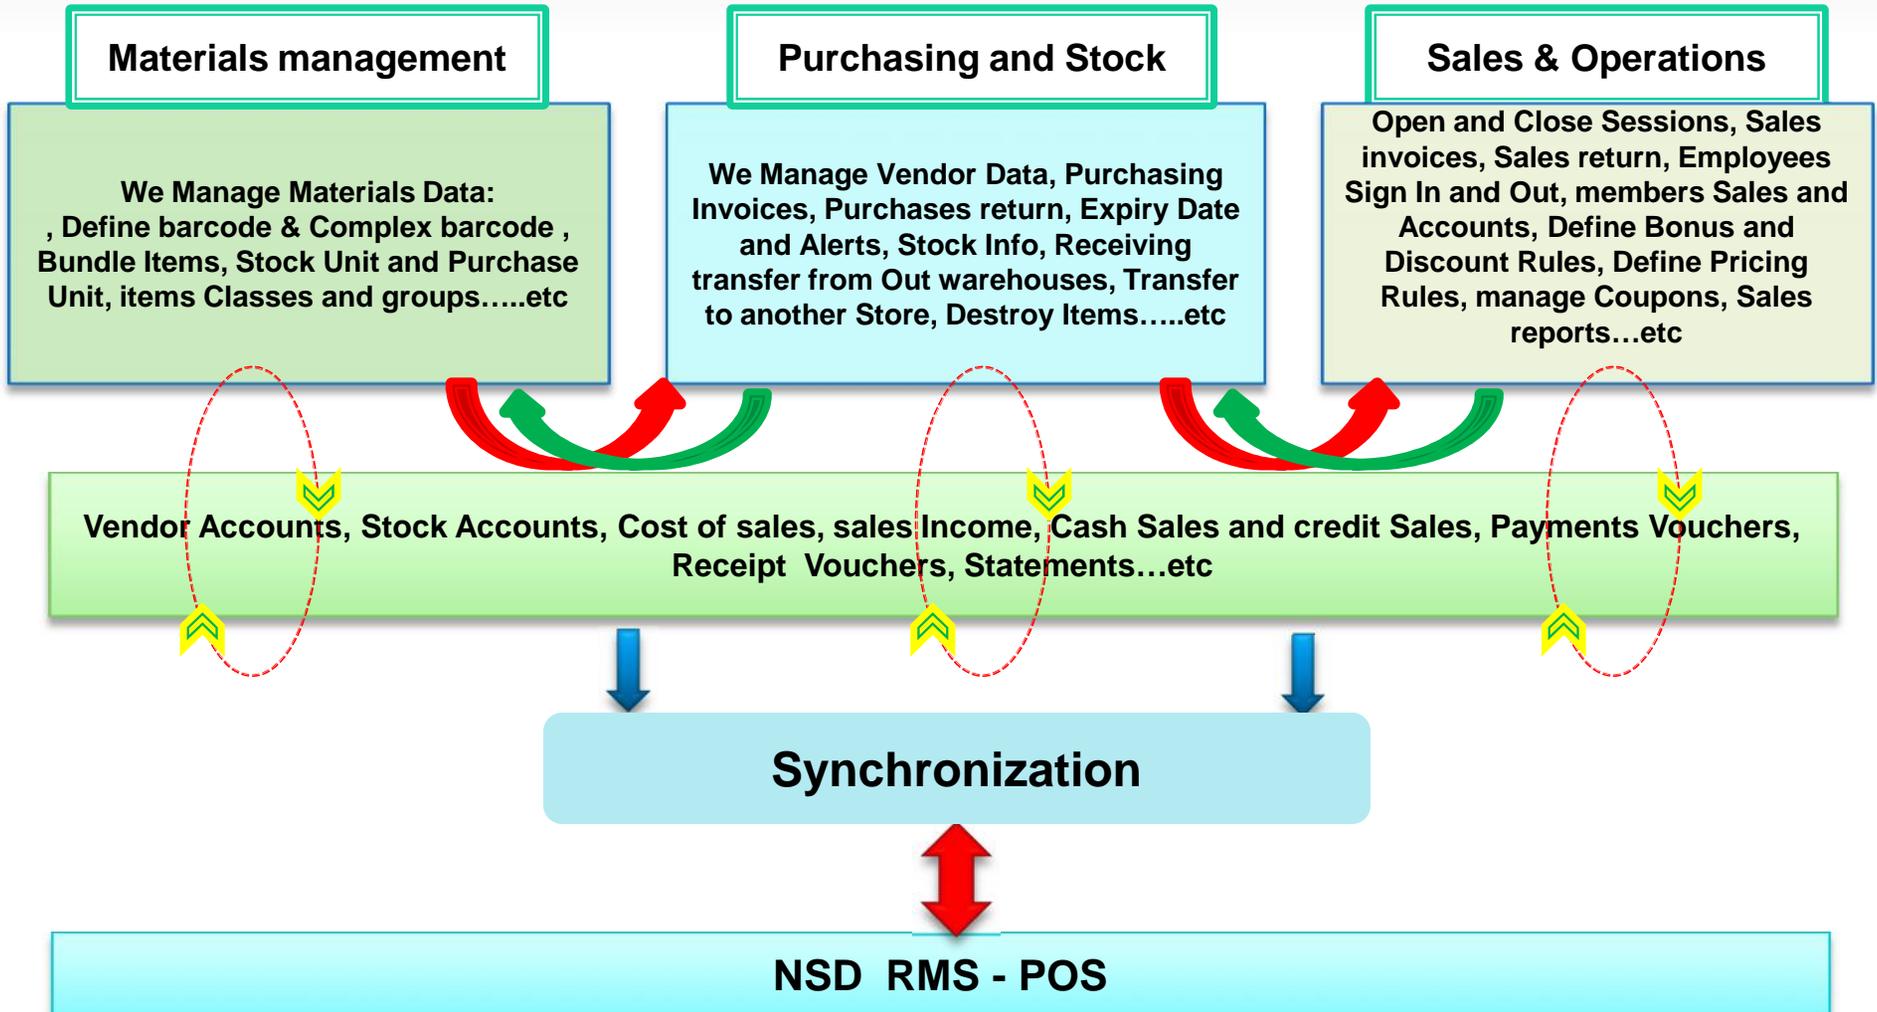

NSD RMS V 5.01 , Powerful and Customizable system

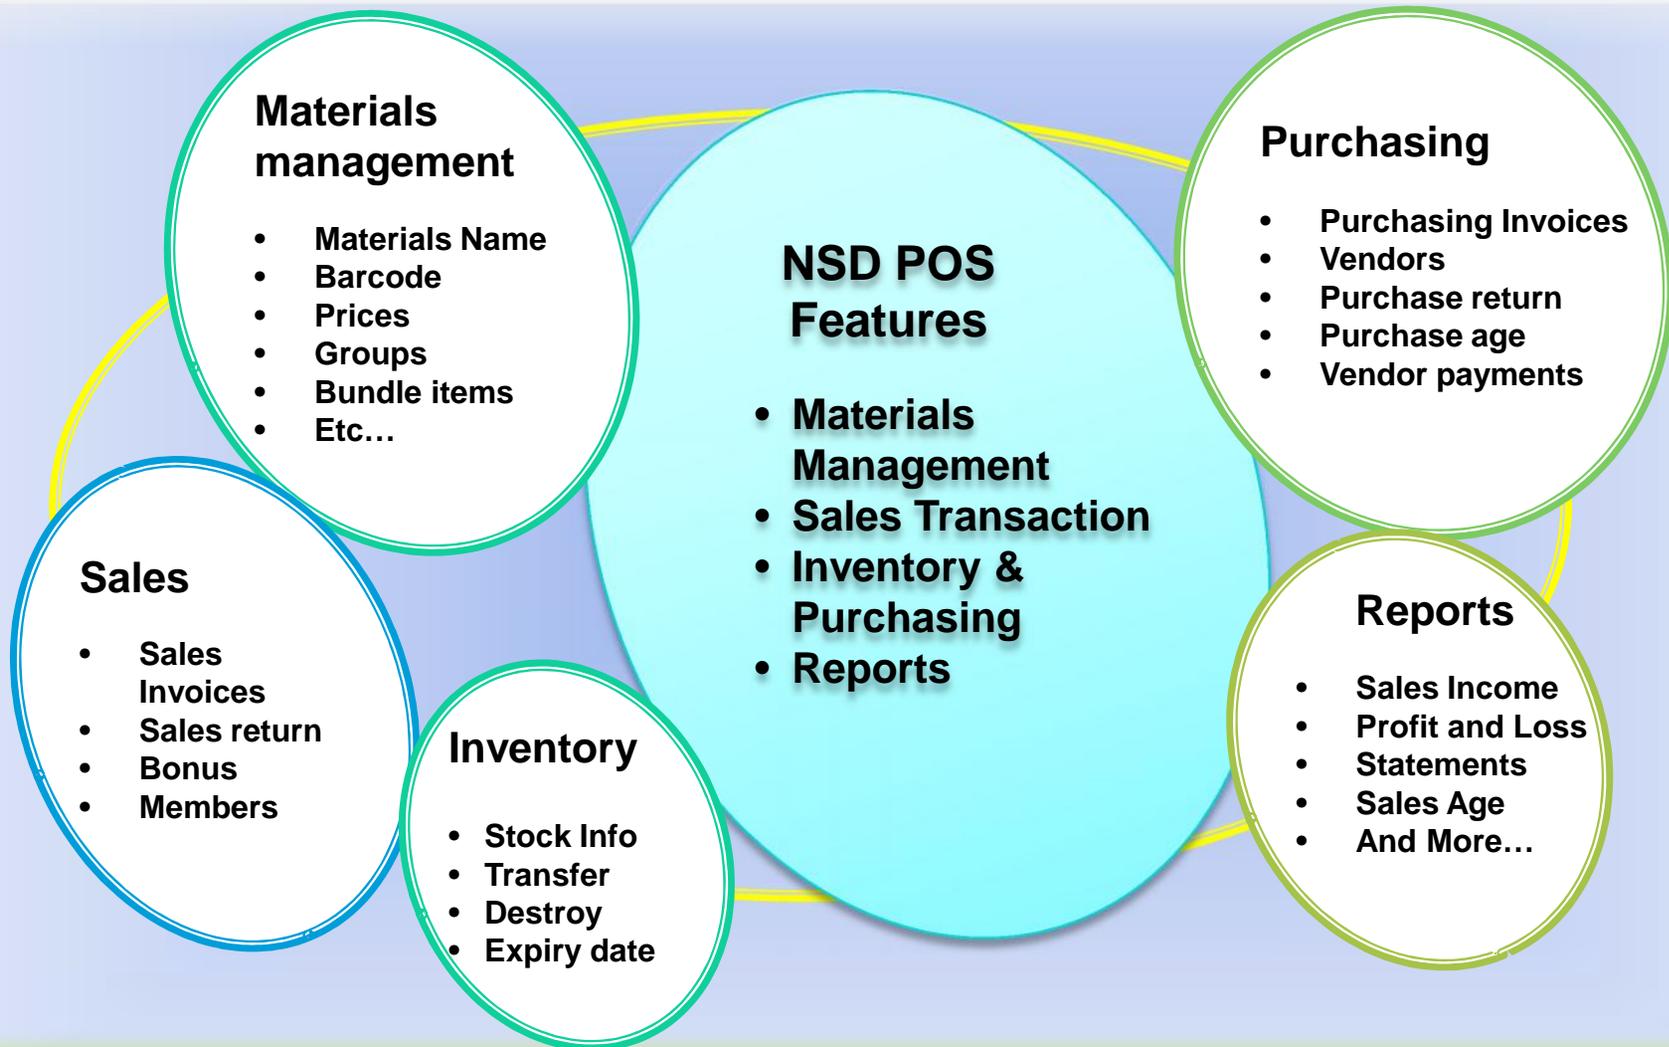

NSD RMS Integration

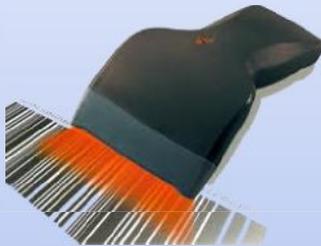

NSD RMS Integration

NSD RMS – Hardware Integration

All needed hardware will be integrated to your NSD POS :

Barcode Scanners
If you use a members vouchers or fidelity cards.. Or for inventory

Scales

Receipt printers

PDA Mobile Application (clients orders, tack away...etc)

NSD configures your hardware to be fully compatible with NSD RMS

NSD RMS - Mobile application

The benefits of NSD-RMS Mobile application are quickly felt by the customer

because order Handling is faster and more accurately. Use of handheld POS devices at the table reduces the risk of errors being made on order capture and processing the order through to the kitchen.

The order is wirelessly passed to the kitchen without any manual re-entering. This makes order handling more efficient and less prone to error. Customers don't have to wait so long for their order to arrive and when it does arrive it is actually what they asked for

Messages Alert System

MAS is an effective tool to monitor and alert about events that you define

An automatic Alert Messages will Appear to the privileged user to warn an event
